

IN THE SPECIFICATION:

Please replace the original specification with the substitute specification submitted herewith in both a marked and a clean version.

In addition, please rewrite the Abstract as follows (a clean version of the amended abstract appears on the next page):

--ABSTRACT OF THE DISCLOSURE

An image processing parameter is determined by moving an image displayed on a map representing a color space to an arbitrary position on the map, and an image process corresponding to the arbitrary position is performed ~~to~~ on the image at the position after the movement. ~~Besides, the~~ The map representing the color space is displayed, and an image processing parameter is determined by relatively moving on the map an image in regard to the map. By ~~such constitutions~~ virtue of these features, operability and sensuous usability in color adjustment are improved.--
